

Total Petrochemicals & Refining USA, Inc.

Corporate Headquarters

August 29, 2017

Dear Valued Customer:

The impact of Hurricane Harvey has resulted in a suspension of production at Total Petrochemicals & Refining USA, Inc.'s (TOTAL) Polypropylene facility in La Porte, TX. Due to this disruption, TOTAL is declaring Force Majeure with regard to the supply of all polypropylene products, effective immediately.

At this time, we are hopeful the Force Majeure will last no more than 2 weeks (14 days) and will continue to share additional information regarding any changes to this.

We appreciate your understanding as we work through this situation together. Your Sales Account Manager will continue to be your primary contact and inform you as additional information becomes available.

Respectfully,

A handwritten signature in black ink, appearing to read "P. Colonna", written in a cursive style.

Paul H. Colonna
Vice President - Polymers Americas
