Re: Polyethylene Force Majeure Notice

Dear Valued Customer:

Issues arising from Hurricane Harvey have significantly limited Chevron Phillips Chemical Company LP's ability to produce and deliver polyethylene products. Therefore, effective immediately and until further notice, Chevron Phillips Chemical is declaring force majeure on all polyethylene products.

Please be assured that Chevron Phillips Chemical is working diligently to minimize the impact of this event on your business and return to full polyethylene deliveries as soon as possible. We are in the process of evaluating the expected duration and will provide you with updates as more information becomes available. You will be contacted by your Chevron Phillips Chemical polyethylene sales representative to discuss the supply plan.

We apologize in advance for any inconvenience to your business.

Sincerely,

A handwritten signature in black ink that reads "James T. Becker".

Jim Becker
Vice President, Polymers
